PROFESSIONAL SUMMARY

Software Engineering undergraduate at IIT / University of Westminster with hands-on full-stack development experience. Passionate about building tech solutions relevant to Sri Lanka's local context. Skilled in React, TypeScript, Node.js, and PostgreSQL with a strong interest in scalable backend systems and clean API design. Self-driven, experienced in independent problem-solving, asynchronous collaboration, and delivering production-ready projects.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, PHP

Frontend: React.js (Vite), HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, REST API Design, JWT Auth

Databases: PostgreSQL, MySQL, MongoDB, Prisma ORM

Tools & Platforms: Git, GitHub, VS Code, Vercel, PowerShell

Practices: OOP, SDLC, Agile, Technical Documentation, Independent Problem Solving

PROJECTS

UNIFLOW – University Student Information Platform

2025

Tech: React.js, Node.js, PostgreSQL, REST APIs

- Architected modular React components and RESTful API endpoints to deliver real-time notifications on class cancellations, academic deadlines, and university announcements.
- Contributed to full-stack development across React.js frontend, Node.js backend, and PostgreSQL with efficient query design.

Ceylon Unbound – Sri Lanka Travel Experience Platform

2025 – Present

Tech: React.js, Vite, CSS3, Vercel **Live:** ceylon-zeta.vercel.app

- Designed and built a cinematic, scroll-driven travel platform showcasing Sri Lanka's highlands, shores, ancient ruins, and culture.
- Implemented smooth scroll animations and a fully responsive UI; deployed and hosted on Vercel.

Blue Collar – Blue Collar Worker Job Platform

2025 – Present

Tech: React.js, TypeScript, Vite, Node.js, Express.js, Prisma ORM, PostgreSQL **Link:** github.com/Amaya-18

- Building a full-stack platform connecting Sri Lankan blue-collar workers with employers, addressing an underserved gap in the local job market.
- Secured user data by implementing JWT-based authentication and role-based access control across frontend and backend services.
- Developed RESTful API endpoints with Prisma ORM for type-safe PostgreSQL access; frontend deployed on Vercel.

Bredix – Smart Livestock Reproductive Monitoring

2025 – Ongoing

Tech: IoT, AI/ML, Mobile Application Design

- Collaborating in a 4-person research team developing a smart livestock monitoring system using IoT sensors and AI-based heat cycle prediction to replace paper-based farm records.
- Designing a mobile app for farmers to track breeding history, pregnancy status, and receive automated alerts.

MINI PROJECTS

Traffic Vehicle Data Management System github.com/Amaya-18

Tech: Python, Tkinter, SQL, OOP

Desktop application for managing vehicle data with SQL-based storage, OOP design principles, and reporting/visualization features.

EDUCATION

BEng (Hons) Software Engineering

Sep 2024 – Present

Informatics Institute of Technology (IIT) / University of Westminster, Colombo

Relevant modules: OOP, Server-side Web Development, Database Systems, Algorithms, Software Engineering Principles, Group Project

G.C.E. Advanced Level

2023

Sri Lanka

Mathematics Scheme — 3 S Passes

G.C.E. Ordinary Level

2020

Sri Lanka

5 A Passes, 4 B Passes

LEADERSHIP & ACTIVITIES

School Prefect

- Promoted leadership, responsibility, and teamwork; coordinated student activities and maintained discipline across the school community.

Technical Volunteer

- Provided technical support during school events including AV setup, presentation coordination, and event assistance.

Science Quiz – Zonal Education Office

- Represented school in competitive zonal-level science quiz, demonstrating analytical and problem-solving skills.
