

AMAYA CHATHUMALI

Software Engineering Undergraduate | QA & Full-Stack Development

Colombo, Sri Lanka | +94 74 287 1308 | amayachathu111@gmail.com | github.com/Amaya-18 | linkedin.com/in/amaya-chathumali
| my-portfolio-eta-red-23.vercel.app

PROFESSIONAL SUMMARY

Final-year Software Engineering undergraduate (IIT / University of Westminster) with hands-on full-stack development and software testing experience. Built and shipped production-style projects spanning React, Node.js, PostgreSQL and Spring Boot, plus a Playwright-based QA tool addressing localization bugs in Sinhala/Tamil web UIs. Comfortable across the STLC — test case design, boundary value analysis, API testing, and cross-browser automation — with a track record of independently delivering full projects end to end.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, PHP

Frontend: React.js (Vite), HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, REST API Design, JWT Auth, Spring Boot

Databases: PostgreSQL, MySQL, MongoDB, Prisma ORM

QA & Testing: Playwright, Manual Testing, Test Automation, STLC, Bug Life Cycle, Boundary Value Analysis, API Testing

Tools: Git, GitHub, Docker, VS Code, Vercel, PowerShell

Practices: OOP, SDLC, Agile, Technical Documentation, Independent Problem Solving

CERTIFICATIONS

Software Testing Foundations: Test Techniques — CompTIA (2026)

Microsoft Security Essentials Professional Certificate — Microsoft & LinkedIn Learning (2026)

Introduction to Generative AI with GPT — Professional Certifications and CEUs (2026)

Artificial Intelligence for Students — LinkedIn Learning (2026)

PROJECTS

BootShield — Spring Boot Dependency & Configuration Risk Scanner

Java, Spring Boot, React.js, Vite, Docker

<https://github.com/Amaya-18/BootShield>

- Built a scanner that parses *pom.xml* files and cross-references every dependency against the OSV.dev API to surface known CVEs, alongside checks for common Spring Boot misconfigurations such as exposed DevTools endpoints and missing security starters.
- Shipped a React + Vite dashboard to visualize findings and containerised the full stack with Docker for one-command local setup.

Blue Collar — Job Platform for Sri Lankan Blue-Collar Workers

React.js, TypeScript, Vite, Node.js, Express.js, Prisma ORM, PostgreSQL

github.com/Amaya-18

- Designed and building a full-stack platform connecting Sri Lankan blue-collar workers with employers, addressing a gap underserved by existing local job portals.
- Implemented JWT-based authentication and role-based access control across frontend and backend; built type-safe REST API endpoints with Prisma ORM over PostgreSQL.

AksharaLens — Localisation QA Tool for Sinhala/Tamil Web UIs

Playwright, TypeScript, Node.js

github.com/Amaya-18/AksharaLens

- Building a Playwright-based automated QA tool that detects layout bugs — text overflow, clipping, misalignment — caused by Sinhala and Tamil text rendering in web UIs designed for English, targeting a testing gap specific to the Sri Lankan market.
- Applies cross-browser automated checks with configurable dictionaries and motion-reduction handling to cut down false positives from animation timing.

UNIFLOW — University Student Information Platform

React.js, Node.js, PostgreSQL, REST APIs

uniflowhub.com

- Architected modular React components and RESTful API endpoints delivering real-time notifications for class cancellations, academic deadlines, and university announcements.

Ceylon Unbound — Sri Lanka Travel Experience Platform

React.js, Vite, CSS3, Vercel

ceylon-zeta.vercel.app

- Designed and built a cinematic, scroll-driven travel platform showcasing Sri Lanka's highlands, shores, ancient ruins, and culture, with custom scroll animations and a fully responsive UI.

Handstorm — Hand-Controlled Particle System

JavaScript, HTML5 Canvas, MediaPipe Hands

handstorm.vercel.app

- Built a real-time particle system rendering hundreds of animated particles that respond to webcam hand tracking (MediaPipe), with physics-based attract/repel/scatter gestures and multi-hand coordination.

EDUCATION

BEng (Hons) Software Engineering — Sep 2024 – Present

Informatics Institute of Technology (IIT), affiliated with University of Westminster, London

Relevant modules: OOP, Server-side Web Development, Database Systems, Algorithms, Software Testing, Group Project

G.C.E. Advanced Level (2023) — Chilaw/Wennappuwa Holy Family Balika M.V.

LEADERSHIP & ACTIVITIES

- **Junior and Senior School Prefect** — Promoted leadership, responsibility, and teamwork; coordinated student activities and maintained discipline across the school community.
- **Technical Volunteer** — Provided technical support during school events including AV setup, presentation coordination, and event assistance.
- **Science Quiz — Zonal Education Office** — Represented school in a competitive zonal-level science quiz, demonstrating analytical and problem-solving skills.
- **Scrabble, School Player** — Represented school in competitions and participated in provincial-level games.
- **School Media Club Member** — Coordinated student activities and volunteered in media campaigns.
